IMPIANA INTERNATIONAL COLLEGE was established 15 years ago also known as Art Direction Design Education. It is one of the pioneers of Art and Design Colleges in Malaysia, with a mission to educate the young generation, thus creating a pool of trained artists and designers. In order to achieve this mission, IMPIANA inculcates and nurtures students through carefully designed education programs. The analytical and problem solving skills, integral to visual communication, are part of the thorough programs offered.

A conducive environment is equally important through the learning process to enhance creative growth.

Computer Graphics

Adobe Photoshop

Adobe Photoshop is a professional software package that can be used by experts and novices alike. It has been described as "an industry standard for graphics professionals." It is hands down, the most popular program for creating or modifying images and stunning visual effects.

This is true not only because Photoshop is available on a wide array of platforms, but because after few generations of development, Adobe Photoshop has the most intuitive user interface, the most complete set of tools, and the largest number of reference books around.

This software is very popular in the designer community because of its stunning and new features with the help of which designer can make beautiful graphics very quickly. Images can be crafted and manipulated so skillfully that — in many cases — you can't tell an altered image from an unaltered one.

Adobe Illustrator

Illustrator is a vector drawing program. It is often used to draw illustrations, cartoons, diagrams, charts and logos. Over years Adobe Illustrator has become the standard application when it comes to illustration design.

Unlike bitmap images that stores information in a grid of dots, Illustrator uses mathematical equations to draw out the shapes. This makes vector graphics scalable without the loss of resolution. E.g., Illustrator is often used to quickly transform hand-drawn sketches on a sheet of paper into lively and colorful digital images.
